Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Feb 11, 2003
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

Art Unit: 1711

1. It is noted that the amendment of February 11, 2003 fails to comply with the provisions of the previous or current versions of 37 C.F.R. 1.121, because the clean copy of claim 1 contains bracketed matter.

2. Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicants have failed to adequately define the term, "average molecular mass".

Despite applicants' response, it is unclear how the term is to be interpreted relative to such conventional terms as "number average molecular weight" or "weight average molecular weight". Since the relied upon Elias reference does not specifically cite the phrase, it is unclear that the reference provides any clear definition as to how the term is to be interpreted.

3. Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In view of the lack of definition of the term, "average molecular mass", the position is taken that adequate enablement has not been provided for the claimed invention.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 1711

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 2, 9, 11, and 12 are rejected under 35 U.S.C. 102(b or e) as being anticipated by Van Antwerp et al. ('439 or '162).

Patentees disclose polyureas and coatings produced therefrom, wherein the polyureas are the reaction product of isophorone diisocyanate and isophorone diamine. See polymer 10 within Table 1. The claimed molecular weight characteristic is considered to be an inherent feature of the disclosed polyurea.

6. Claims 1, 2, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Grogler et al. ('280).

Patentees disclose polyureas, wherein the polyureas are the reaction product of isophorone diisocyanate and isophorone diamine. See Example 25. The claimed molecular weight characteristic is considered to be an inherent feature of the disclosed polyurea.

Art Unit: 1711

7. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Login ('510).

Patentee discloses polyureas, wherein the polyureas are the reaction product of hexamethylene diisocyanate and isophorone diamine. See Example 11. The claimed molecular weight characteristic is considered to be an inherent feature of the disclosed polyurea.
